Company: Recruitment Matters

Location: Lusaka

Category: other-general

Overview

Our client in the Milling Industry is looking for a well experienced Animal Nutritionist to join their team; **Duties and responsibilities include but are not subject to;**

Develop nutritionally balanced feed formulations for different animal species, considering their specific nutritional requirements, growth stages, production goals, and health conditions.

Ensure the feed formulations comply with regulatory standards and industry guidelines.

Conduct nutritional analysis of feed ingredients and finished feed products using laboratory techniques and software tools.

Analyse the nutrient content, digestibility, and bioavailability of feed components to ensure optimal animal performance and health.

Stay abreast of the latest scientific advancements, research findings, and industry trends in animal nutrition.

Collaborate with internal and external stakeholders to conduct research studies, trials, and experiments aimed at improving feed formulations and identifying innovative nutritional solutions.

Establish quality control procedures to monitor the consistency, quality, and safety of feed ingredients and finished feed products.

Conduct regular audits, inspections, and product testing to ensure compliance with regulatory

standards and address any quality concerns.

Customer Support and Consultation: Provide technical support, guidance, and consultation to farmers, ranchers, livestock producers, and feed manufacturers.

Assist them in optimizing feed rations, addressing nutritional challenges, and improving animal performance, productivity, and profitability.

Develop educational materials, training programs, and presentations to educate stakeholders about animal nutrition principles, feed management practices, and emerging trends.

Conduct workshops, seminars, and training sessions for industry professionals, veterinarians, and farmers.

Collaborate with internal teams, such as sales, marketing, and research and development, to support product development, marketing initiatives, and customer engagement activities.

Foster relationships with external partners, including academic institutions, industry associations, and research organizations, to stay connected with the broader scientific community and exchange knowledge.

Key Skills;

Strong understanding of different animal species' nutritional requirements, especially poultry.

Experience in conducting research studies, data analysis, and experimental design.

Proficiency in using nutrition software and analytical tools for feed formulation and nutrient analysis.

Excellent problem-solving skills and ability to interpret scientific research findings.

Strong communication skills to effectively interact with diverse stakeholders and deliver technical information in a clear and concise manner.

Ability to work independently, manage multiple projects simultaneously, and meet deadlines.

Familiarity with regulatory requirements and quality control practices related to animal feed

production.

Excellent communication skills.

Resilience.

Key Qualifications;

BSc degree in Animal Science.

Postgraduate degree (Masters and/or Ph.D.) in Animal Nutrition, Feed Science, Animal Science, or a related field.

3 years of working experience would be preferential.

Extensive knowledge of animal nutrition principles, feed formulation, and feed manufacturing processes.
