

Mechanical Engineer (Australian accredited)

[Apply Now](#)

Company: PRI

Location: Lusaka

Category: other-general

Overview

Our clients are a well-established international group with a global brand which specialises in the sale of handrail fittings and systems, pedestrian barriers & associated products. They are currently looking for an enthusiastic and experienced Mechanical / CAD Engineer based in Zambia.

The candidate will conduct design load calculations for simple tubular structures, including applications on ramps and staircases and wind loadings where required; assess compliance of handrail and guardrail designs against relevant national and international standards; interpret customer designs to generate bills of material and bespoke drawings.

Key Requirements:

- Mechanical, structural or civil engineering experience and be at ease with reading and producing technical drawings
- Experience and competence in using CAD software
- An engineering degree accredited to the Washington Accord
- At least 5 years' experience in the last 10 years of engineering directly associated with Australian buildings, 4 years of which must be post-graduate
- A full understanding of Australian building law and standards, including National Construction Code, with evidence of relevant work experience
- Meet the requirements to be a Registered Engineer in Australia, plus those of the Australian Building Licensing Authority
- Experience with handrails or castings

Interested and qualified candidates may send CVs to Namambo at
