Company: PRI

Location: Zambia

Category: other-general

Overview

We are hiring

Our client is looking to hire a technical services manager to join the team in a very remote location in Muchinga, North Zambia. They will be involved in the running and servicing of a very large vehicle fleet of 125 vehicles and machinery from small to large scale, and need to transition the deep-bush based workshop to a new purpose built workshop on the park boundary.

Purpose:

Coordinate and oversee all technical activities (vehicle and machinery workshop, solar power installations and infrastructure maintenance, road construction and maintenance) within the area Landscape.

Lead and contribute to the development of the teams for the above through hands on maintenance and consolidate and manage the efficiency to support their growth and development through strategic planning , implementation and targeted delivery.

Supervise technical services stores systems, processes and procedures for procurement and stock management of spare parts and hardware

Stay up to date with technological advances in vehicle servicing, maintenance, procurement and management to ensure the large fleet is managed for optimum performance

Develop and implement the Road Construction and Maintenance Plan for our client

including road construction (new) and maintenance (existing) by implementing measures such as laterite application, miter drains, cambering, etc.

Coordinate annual road opening (slash and harrow) maintenance efforts for road network approximately 1,500 km

Contribute to overall annual budget development with specific details for the workshop, road construction

Oversee and manage solar infrastructure, including installations, maintenance and repairs

Develop, establish and maintain relationships with suppliers

Coordinate delivery logistics for spare parts, fuel, and personnel

Develop, refine, and implement standardised operating procedures (SOPs) including waste management, OHS and associated risk mitigation

Contribute to preparation of expenditure and activity reports for donors

Provide monthly reports to the Programme Director

Provide input and data for department related Asset Register records and appropriate replacement and disposal plan for these assets

Be able to diagnose faults and assign repairs as needed, establish and implement a Rescue and Repair protocol and facilitate driver training, including off-road 4WD driving

Ensure power generation is managed efficiently with clear replacement / maintenance, increased generation and development mitigation plans

Oversee carpentry activities, including timber procurement and tool management

Handle stock management and conduct monthly fuel consumption analysis

Analyse and invoice departmental internal cost centers

Qualifications

A bachelor's degree in mechanical engineering or relevant discipline

Post graduate degree will be an added advantage

10 years practical work experience, preferably in a similar position

Strong knowledge and practical experience in road construction

Strong knowledge of motor vehicle and heavy equipment repairs

Other attributes:

Self-motivated, disciplined and determined to work within the flexibility nature of the work

Excellent communication skills

Ability and willingness to work in a rural setting

Ability to work as team

Ability to adhere to work ethics

Willingness to support our implementing rural teams with their needs
